

2013 Annual report

Financial statement:

In conformity with the Article 5 of the operating agreement of the association:

Income 2013: zero
Expenditure 2013: zero

Technical report:

Collaboration MUFON - Academy of Ufology

The year 2013 began with the announcement of a collaboration at the international level between the MUFON and the Academy of Ufology. This objective was already the subject of a report after a visit to the Northern California MUFON in June 2007.

More recently, John Tomlinson took the initiative to gather in the Academy some ufologists from all Countries, on the base of the MUFON's members.

In 2012, David Mac Donald President of the MUFON, had announced he intended to enhance the dialogue between the MUFON-USA and others European MUFON. In this context, David came to Paris on January 11th, 2013 to make a presentation.

During this show, Jacky Kozan made a presentation of the state of the cooperation with the U.S. MUFON and presented a first chart of the MUFON-France that started with members of the Academy of Ufology and external ufologists. John Tomlinson was responsible of the foundation of the MUFON-France.

Regarding ufology, the strategies of the MUFON and the Academy of Ufology are different and soon there were differences and incompatibilities.

The MUFON is oriented field investigations and IT management. Its purpose is to gather data and to manage and archive them, while the Academy of Ufology is dedicated to the study of these data, to determine directions for future research. For the Academy of Ufology the priority is political actions, initially highlighting ignorance (real or simulated) of the Science regarding the UFO phenomenon. In a second step, informing the Politics of this incompetence and therefore the

risk of ethnocide. Various actions to inform citizens are led by the academicians through their own associations by the method of mouth.

Due to these differences on UFO strategies and other differences on management methods Jacky Kozan asked David Mac Donald to remove him of the position of National Director of MUFON France, on February 07th, 2013. John Tomlinson on his side quitted the Academy on January 26th. Since that date, no action has been proposed in the frame of a formal cooperation, neither by the Academy nor by the MUFON.

For two years the French ufology has suffered various attacks aiming to discredit existing UFO organizations or persons. The French ufologists accustomed to controversies orchestrated by debunkers, has seen come these operation of destabilization. They have communicated with each other and did not let themselves trapped in the various provocations. The UFO landscape still partly changed but we note some improvements around or changes in efficiency. I mention, for example, the work done by Daniel Robin and his team in the association "Ovni Investigation" and on the "Rencontres des Sciences et de l'Inexpliqué".

Collaboration GEIPAN / Academy of Ufology

During meetings between the MUFON , the Geipan and the Academy of Ufology on January 11th, 2013 in Paris , informal agreements were accepted by stakeholders. In agreement with the MUFON and GEIPAN, Jacky Kozan committed himself to adapt the results of surveys at the MUFON database format so that they could be usable by the GEIPAN.

A first step concerned a list 59 cases of observations made in France who were in the database of the MUFON since 1971. Only 5 cases of this table fit with the "TRUFO" (Thru UFO) label.

The table was prepared for the meeting of January 11th, 2012 in Paris. There were no other cases sent to the Academy of Ufology by the MUFON.

During the year, the Academy of Ufology has got five cases sent to by witnesses. For two of these stories there is suspicion of RR3 or RR4 cases.

Four cases were forwarded to GEIPAN and three to the MUFON France. The fifth is affected by Article 15 of the Operating Agreement of the Academy of Ufology on confidential works.

One of the four cases forwarded to GEIPAN , the disappearance of two retired people from "Trans-en-Provence", being at the origin of the " Open Letter to the President of the Board of Administration of CNES " written at the end of the year.

The purpose of the open letter is to highlight the determination of the CNES to trivialize the observations of UAP, rather than quickly react to an event disturbing the witnesses and their family.

Open Letter to the Academy of Sciences

The letter sent in June received a quick answer, a handwritten note of the secretariat of the President: "*Mister TAQUET has received your mail but can not answer.*"

At least the answer is clear.

The objective of this type of mail is to state the official position of the scientific world and of the political world in order that we, the ufological associations, could respond to the questions of the citizens.

To extend the approach, at the end of the year we worked on an "Open Letter to the President of the Board of CNES ". It was prepared for shipment in early 2014. After a highlighting of legal incompetence of the Science regarding the UFO phenomenon, our action will be directed towards the political world.

International Cooperation

Our correspondents in Argentina have done an excellent job in particular by facilitating the UFO encounters of Buenos Aires to Rio 54 coffee. Thank you to Rubén Morales and Mario Lupo. We regularly receive the invitations to meetings and the reports.

Andres Salvador has lead the UFO encounters of Corrientes which held its 15th meeting in September.

Since Miami, Albert Rosales has shared with us a little-known case: "the little green men of Mini-mini" and " the roaring 20's, the forgotten cases".

Ken Pfeifer feeds us with illustrated cases, which allows us to build files of selected cases.

We saw Paul Stonehill in a broadcast on channel 24 French Television (RMC Decouverte), in which he spoke of the Valley of Death Siberia.

In Argentina the CEFAE was established to investigate UFOs, whatever they are.

The Air Force of Peru has announced the reopening of its UFO department. Since March 13th, the Equator has declassified documents concerning 44 UFO cases and. The CEIFO is the Ecuadorian Commission for the Investigation of the UFO Phenomenon

Communication on the UFOs theme

We enjoyed the broadcast of "extraordinary investigations" aired on August 21th on Channel 6 of the French television."

Vincent and Stéphane Leroux, supporters of the Academy of Ufology, have prepared a short film, "The Fourth Night", which will be been presented to "UFO encounters" in Paris in January 2014.

Notable works:

- **The Neguentrons and neguentropic fields theory**, was published by Claude LAVAT in March. One can imagine in the future a weather bulletin announcing the density and types of néguentron expected in France for the next day.
- **Articles published by Daniel Robin:** The Mysterious Triangles, the Poligny Case, an Interview of Paul Hellyer, Orange Disk and Ball, The Triangle of the Cheruy Bridge, The Triangle of Engis and many other texts.
- **Thanks to all the Academicians who participated** in various discussions, thank you for their contributions of information and analysis and their permission to publish their work in the Academy of Ufology.
- **Thanks to everyone who supported us** from the outside and who share with us the results of their work and their analyzes.

Newcomers

The Academy of Ufology welcomed new members:

January 15 - 2013 Ms. Dany PINON
January 18 - Jan Gregory M. Lesieur
January 20 - Jan Patrick Genevaux
January 21 - Jan Ken PFEIFER
January 23 - Jan Marc ANTONIO
July 17 - July Mr. Lou DELALONDRE
August 26 - Martine KINKAL

*Document written on February 15th, 2014 at Le Val Saint Père,
by Jacky Kozan, coordinator of the Permanent Council.*
